

## Container Lock Box

**Availability:** In Stock

**Price:** £42.00

### **Description**

Containers 4 Sale UK containers are made of corten steel and therefore are the most secure containerised product in the current market place. We do, however suggest the extra protection of a lock box facility and a high security padlock. This high security combination offers the best possible on site security option and is also extremely cost effective. It also protects against weather conditions therefore your padlock will last much longer.
